

COLLEGE MANAGEMENT APPLICATION

Day 1 : 03/01/2022,Monday

Topic: Create your salesforce developer org to get started

Milestone / Activities: Creating Developer Account

Account activation

Login to your salesforce Account

Detailed Description: First I sign up the developers.salesforce.com/ with all required information ,after clicking the sign up button I will get an email for activating the developer account ,then I verify the account ,then after I login the salesforce account.

Upload the Screenshot the Milestone / Activities :

The screenshot shows a web browser window with the URL trailhead.salesforce.com/users/profiles/orgs. The page is titled "Hands-On Orgs". At the top, there's a navigation bar with links for TRAILHEAD, Today, Learn, Credentials, Community, For Companies, and COVID-19. On the right side of the header, there's a profile picture for "POOJITHA GOLUSULA" with 87 badges and 75,675 points. Below the header, there's a section titled "Connected Orgs (9)". It lists two orgs:

Developer Edition	LAST USED	Rename	Disconnect	Launch
Username	poojithagolusula042@resilient-hawk-6cvqgh.com			
Type	Developer Edition			
Connected	1/4/2022			
Last Activity	Connected on 1/4/2022			

Lightning Experience Reports & Dashboards		Rename	Disconnect	Launch
Username	empathetic-goat-kltknu.com			
Type	Trailhead Playground			
Created	12/26/2021			
Last Activity	Created on 12/26/2021			

Salesforce Home Page Overview

The screenshot shows the Salesforce Home page with several key components:

- Quarterly Performance:** A chart showing revenue trends from October to December. The Y-axis represents revenue in millions, ranging from 0M to 5M. The X-axis shows Oct, Nov, and Dec. The chart displays three series: Closed (\$3,645,000), Goal (\$765,000), and Closed + Open (>70%) (blue line). The blue line starts at approximately 0.5M in Oct and rises steadily to about 4.5M by Dec.
- Assistant:** A section titled "Assistant" featuring a cartoon illustration of a character standing next to a small boat on stylized waves. Below the illustration, a message reads: "Nothing needs your attention right now. Check back later."
- Today's Events:** A section showing a calendar view with icons representing events like a campsite, birds, and a sun.
- Today's Tasks:** A section showing a calendar view with icons representing tasks like a desk, a person working, and a satellite dish.

At the bottom of the screen, the Windows taskbar is visible, showing various pinned apps and system status indicators.

Day 2 : 04/01/2022,Tuesday

Topic: Custom Object Creation

Milestone / Activities:Create the custom objects for the application

Create fields on college object

Create fields on application form object

Create fields on student object

Create fields on subject object

Detailed Description: First I have created the custom objects then after I created all the fields in College,Application form,Student and Subject objects according to the project details

Upload the Screenshot the Milestone / Activities :

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes tabs for 'Setup', 'Home', and 'Object Manager'. The main area displays the 'College' object details. On the left, a sidebar lists various configuration options: Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Triggers, and Validation Rules. The right side shows a table titled 'Fields & Relationships' with 11 items, sorted by Field Label. The table columns are: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The data includes:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Capacity Students	Capacity_Students__c	Picklist		
College Fees	College_Fees__c	Currency(7, 2)

Validation Rules

22:43 05-01-2022

The screenshot shows the Salesforce Setup interface for the 'College' object. Under the 'Validation Rules' tab, a single validation rule is displayed. The rule, named 'Rule_1', checks if the college name is not equal to the name. It has a status of 'Active' and is located at the top of the page. The rule was created by 'POOJITHA.GOLUSULA' on 1/5/2022 at 8:25 AM.

The screenshot shows the Salesforce Setup interface for managing validation rules. The left sidebar lists various setup categories like Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, and Search Layouts for Salesforce Classic. The main content area is titled "Application Form Validation Rule" under "Validation Rule Detail". It displays the following details:

Rule Name	Application_form_rule
Error Condition Formula	AND(Ready_To_Join__c == true, OR(ISCHANGED(Address__c), ISCHANGED(College__c), ISCHANGED(DOB__c), ISCHANGED>Email__c), ISCHANGED(Guardian_Name__c), ISCHANGED(Phone__c)))
Error Message	no error

Modified By	POOJITHA GOLUSULA 1/8/2022, 7:19 AM

The status bar at the bottom indicates the user is ENG IN, with a battery level of 21:45 and a date of 08-01-2022.

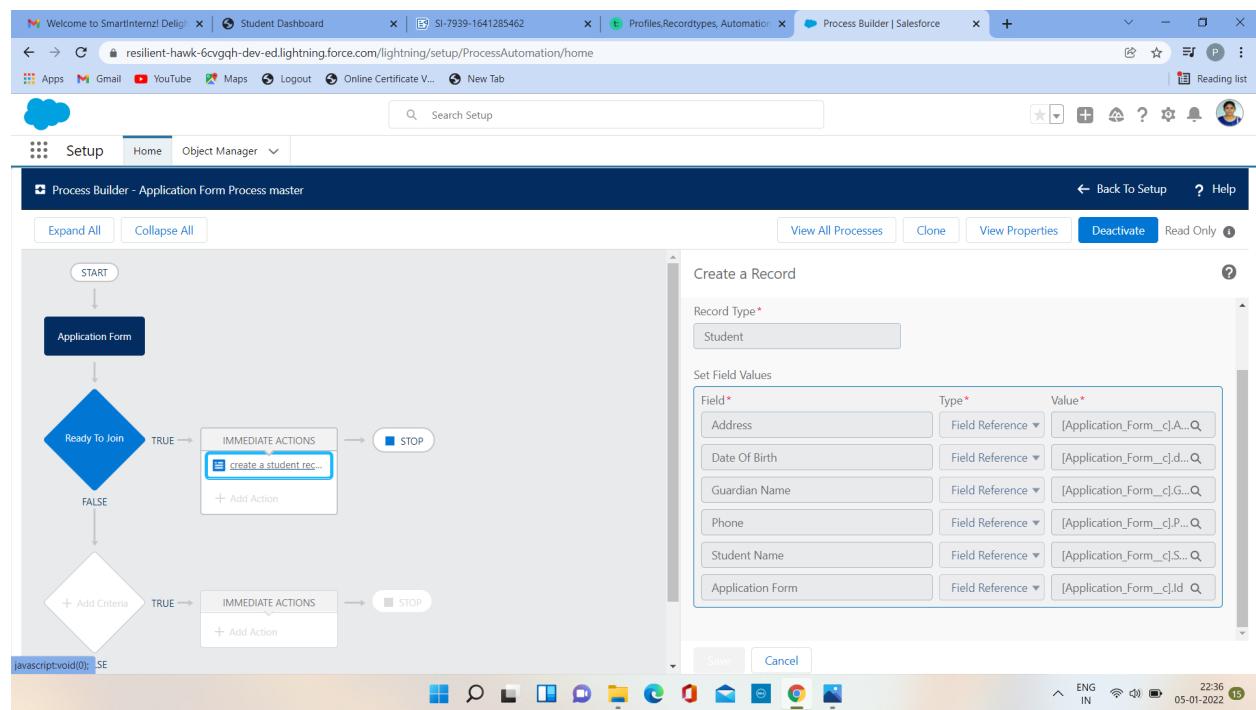

Day 4 :06/01/2022, Thursday

Topic: Process Builder

Milestone / Activities:Process Automation

Detailed Description:I have created builder named Application Form Process master setup>quick find box>process builder>new,created as per information given in project details

Upload the Screenshot the Milestone / Activities :

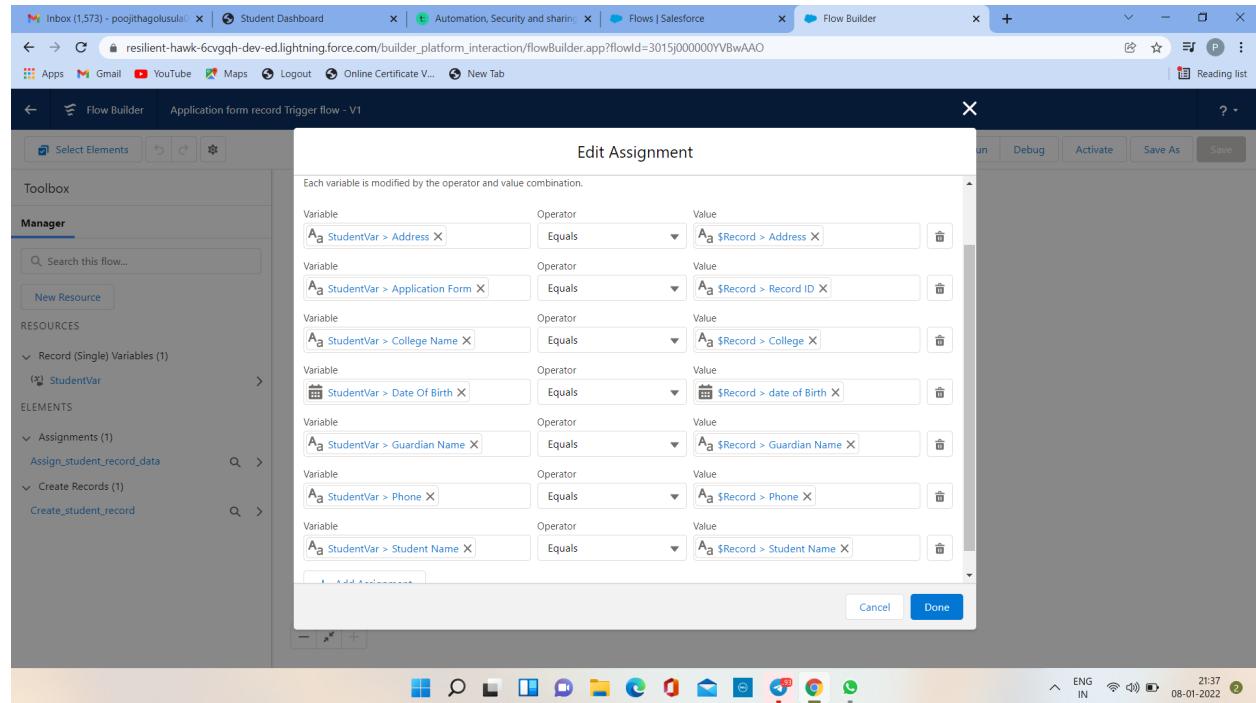

Day 5 :07/01/2022 , Friday

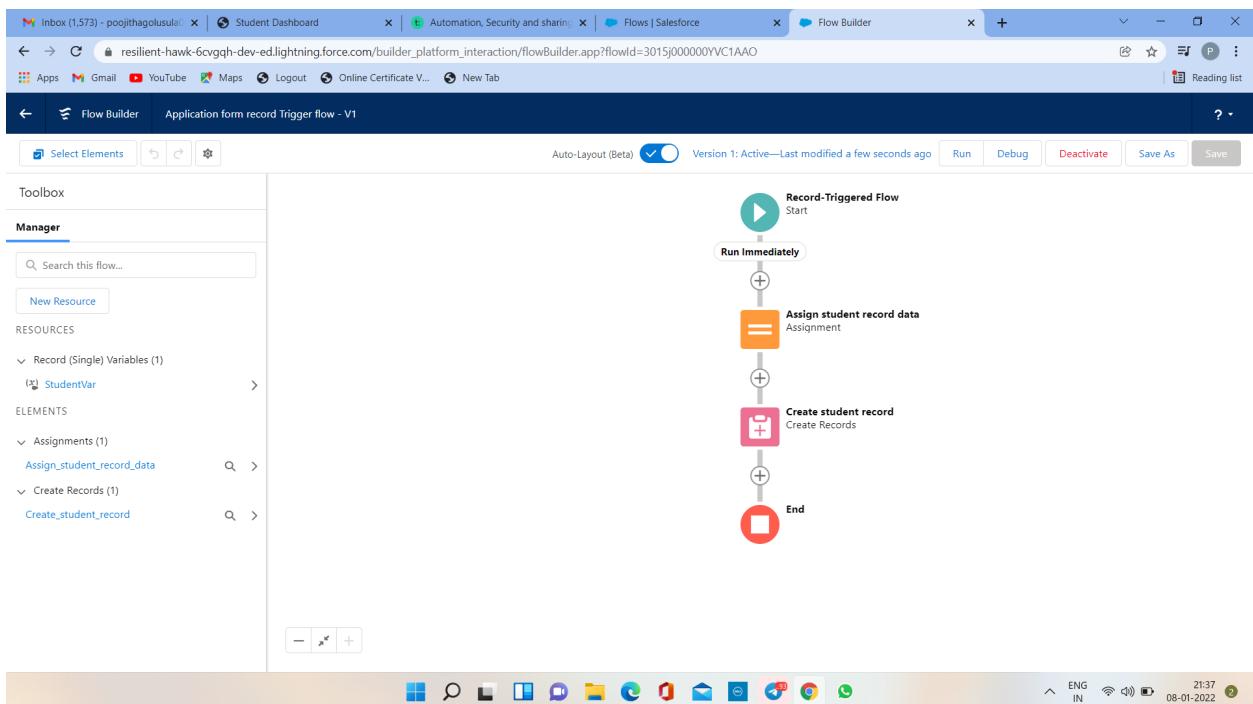

Topic: Flows

Milestone / Activities: Create the student record using flow

Detailed Description: I have created the application form record trigger flow , in that I have created a variable named student in the resource section and I add the some assignments and then created the student record.

Upload the Screenshot the Milestone / Activities :

Day 6 :10/01/2022,Monday

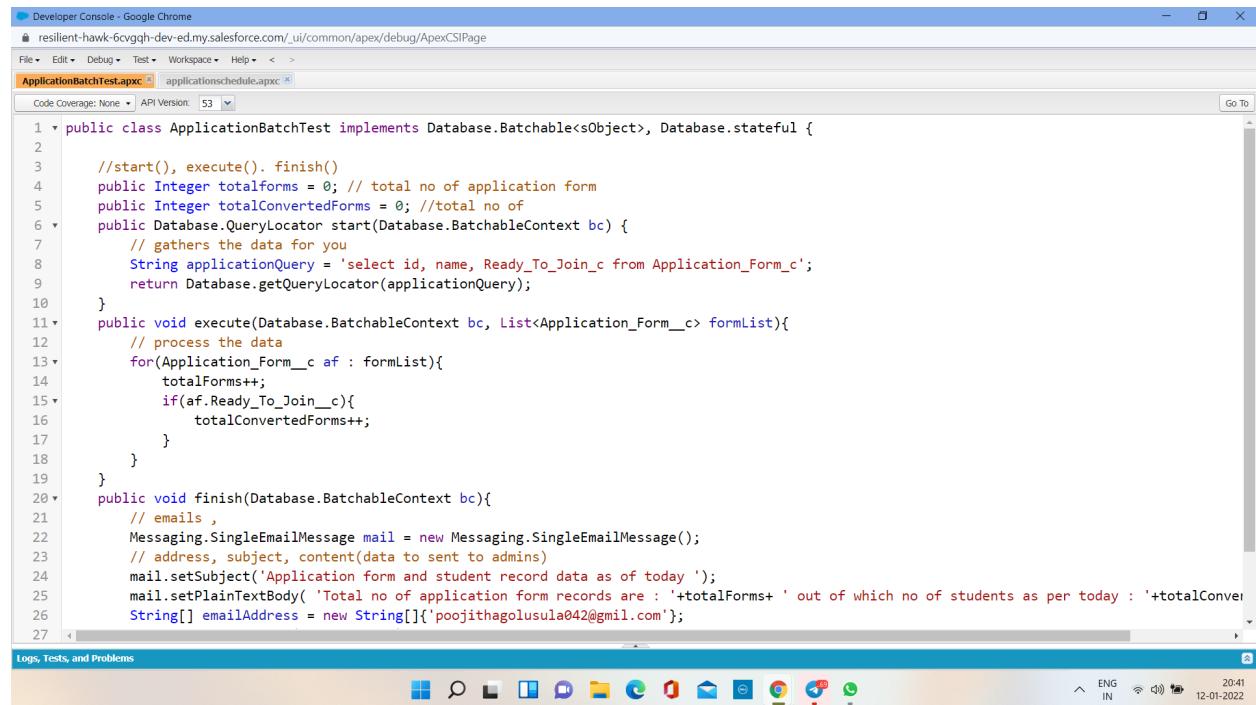

Topic: Batch Apex

Milestone / Activities:Create a Batch apex for Application form

Create a Schedular class

Detailed Description: First I have created the batch apex for application form in developer console then I have created another class named application schedule, then after I schedule the apex setup>apex classes>schedule apex,then I excute the code after that I received an email.

Upload the Screenshot the Milestone / Activities :

The screenshot shows the Salesforce Developer Console interface. The title bar reads "Developer Console - Google Chrome" and the URL is "resilient-hawk-6cvqgh-dev-ed.my.salesforce.com/_ui/common/apex/debug/ApexCSIPage". The menu bar includes File, Edit, Debug, Test, Workspace, Help, and a search icon. The top navigation bar has tabs for "ApplicationBatchTest.apxc" (selected) and "applicationschedule.apxc". Below the tabs, there are dropdowns for "Code Coverage: None" and "API Version: 53". A "Go To" button is also present. The main content area displays the Apex code for the ApplicationBatchTest class:

```
1 public class ApplicationBatchTest implements Database.Batchable<sObject>, Database.stateful {
2
3     //start(), execute(). finish()
4     public Integer totalForms = 0; // total no of application form
5     public Integer totalConvertedForms = 0; //total no of
6     public Database.QueryLocator start(Database.BatchableContext bc) {
7         // gathers the data for you
8         String applicationQuery = 'select id, name, Ready_To_Join_c from Application_Form_c';
9         return Database.getQueryLocator(applicationQuery);
10    }
11    public void execute(Database.BatchableContext bc, List<Application_Form_c> formList){
12        // process the data
13        for(Application_Form_c af : formList){
14            totalForms++;
15            if(af.Ready_To_Join_c){
16                totalConvertedForms++;
17            }
18        }
19    }
20    public void finish(Database.BatchableContext bc){
21        // emails ,
22        Messaging.SingleEmailMessage mail = new Messaging.SingleEmailMessage();
23        // address, subject, content(data to sent to admins)
24        mail.setSubject('Application form and student record data as of today ');
25        mail.setPlainTextBody( 'Total no of application form records are : '+totalForms+ ' out of which no of students as per today : '+totalConvertedForms );
26        String[] emailAddress = new String[]{'poojithagolusula042@gmail.com'};
27    }
}
```

The code implements a batchable class with methods for start, execute, and finish. It counts application forms and students, and sends an email with the total counts. The code is annotated with comments explaining its purpose.

ENG IN 19:15 16-01-2022

Day 10 : 17/01/2022,Monday

Topic: Lightning Web Components

Milestone / Activities: Create College dataTable Component(APEX CLASS)

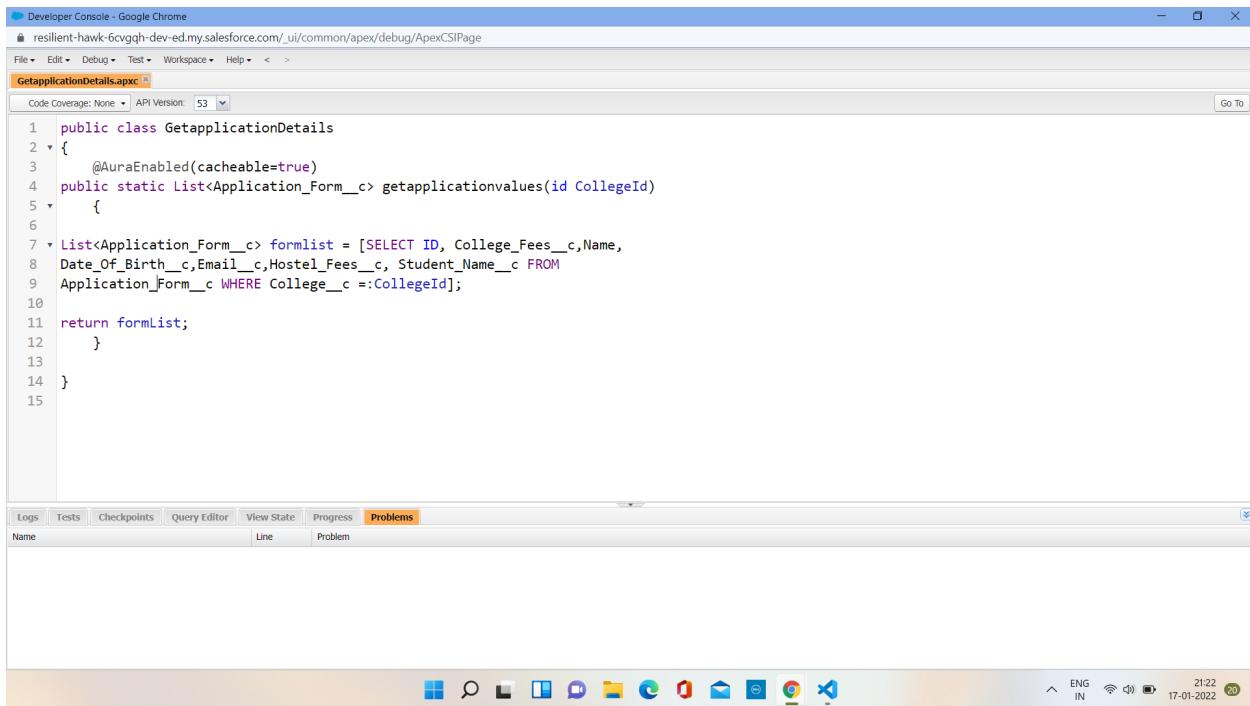

Create College dataTable Component(HTML FILE)

Create College dataTable Component(JAVA SCRIPT FILE)

Create College dataTable Component(META FILE)

Detailed Description: First I have created the apex class named GetApplicationDetails in developer console,then I download and instal the vscode and created the htmlfile,javascript file,meta file.

Upload the Screenshot the Milestone / Activities :

The screenshot shows the Salesforce Developer Console interface. The title bar reads "Developer Console - Google Chrome". The address bar shows the URL "resilient-hawk-6cvqgh-dev-ed.my.salesforce.com/_ui/common/apex/debug/ApexCSIPage". The menu bar includes "File", "Edit", "Debug", "Test", "Workspace", "Help", and "Go To". The main area displays the Apex code for the "GetapplicationDetails.apxc" class:

```
1  public class GetapplicationDetails
2  {
3      @AuraEnabled(cacheable=true)
4      public static List<Application_Form__c> getapplicationvalues(id CollegeId)
5      {
6
7          List<Application_Form__c> formlist = [SELECT ID, College_Fees__c,Name,
8          Date_of_Birth__c,Email__c,Hostel_Fees__c, Student_Name__c FROM
9          Application_Form__c WHERE College__c =:CollegeId];
10
11         return formList;
12     }
13
14 }
15
```

Below the code editor, there is a toolbar with tabs: "Logs", "Tests", "Checkpoints", "Query Editor", "View State", "Progress", and "problems". The "problems" tab is selected. At the bottom of the screen, there is a taskbar with various icons and system status indicators.

The screenshot shows the Visual Studio Code interface with the following details:

- File Bar:** File, Edit, Selection, View, Go, Run, Terminal, Help.
- Title Bar:** HTML file - Visual Studio Code.
- Left Sidebar:** Includes icons for Find, Search, Open, Save, Undo, Redo, and a status bar showing "Ln 15, Col 12".
- Central Area:** A code editor window titled "Get Started" containing the following code:

```
C: > Users > DELL > < HTML file > ...
1  <template if:true={recordList}>
2    <lightning-dataTable
3      key-field="id"
4      data={recordList}
5      show-row-number-column
6      hide-checkbox-column
7      columns={columnsList}
8    >
9  </lightning-dataTable>
10 </template>
11
12 <template if:true={error}>
13   {error}
14 </template>
15 </template>
```

The code is a template for a lightning datatable, defining a key-field, data source, and columns. It also handles errors.

Bottom Status Bar: Shows "Spaces: 4", "UTF-8", "CRLF", "HTML", and a file icon. The bottom right corner displays the date and time: "17-01-2022 21:32".

The screenshot shows a Visual Studio Code interface with the following details:

- File Bar:** File, Edit, Selection, View, Go, Run, Terminal, Help.
- Tab Bar:** Get Started, HTML file, JavaScript file.txt 2 (highlighted in red), META file.xml.
- Code Editor:** The main area contains a JavaScript file named "JavaScript file.txt". The code imports "LightningElement", "api", and "wire" from "lwc", and "getapplicationvalues" from "@salesforce/apex/GetapplicationDetails.getapplicationvalues". It defines a class "collegeDatatable" extending "lightningElement". The class has a "columnsList" array containing 11 items, each with a label and field name. It includes methods for "recordId", "recordList", and "error". It also has a "wiredCollegeData" method that takes "data" and "error" as parameters. Inside this method, it checks if "data" is present and assigns it to "recordList". If there is an "error", it sets "error" to the error object and "recordList" to undefined. The code ends with a closing brace for the "wiredCollegeData" method.
- Bottom Status Bar:** Ln 30, Col 1 | Spaces: 4 | UTF-8 | CRLF | JavaScript | 21:32 | ENG IN | 17-01-2022 | 20
- Bottom Icons:** Standard Windows taskbar icons for File, Copy, Paste, Find, etc.

A screenshot of the Visual Studio Code interface. The title bar reads "META file.xml - Visual Studio Code". The left sidebar shows icons for Get Started, HTML file, JavaScript file.txt 2, and META file.xml. The main editor area contains the following XML code:

```
C:\> Users > DELL > META file.xml
1  <xml version="1.0">
2  <LightningComponentBundle
3  xmlns="http://soap.sforce.com/2006/04/metadata">
4  <apiVersion>51.0</apiVersion>
5  <isExposed>true</isExposed>
6  <targets>
7  | <target>lightning__RecordPage</target>
8  | <target>lightning__AppPage</target>
9  | <target>lightning__HomePage</target>
10 </targets>
11 </LightningComponentBundle>
```

The status bar at the bottom shows "Ln 11, Col 28" and "Spaces: 4" and "UTF-8" and "CRLF" and "XML". On the far right of the status bar, there are icons for ENG, IN, battery level (20%), and the date/time "17-01-2022 21:32".
